Best Proctologist in Mumbai – Expert Piles, Fissure & Fistula Care at Dr Akash N Bagade's Clinic

Consult the best proctologist in Mumbai at Dr Akash N Bagade's Advanced Piles Clinic. 12+ years of expertise, laser treatment & daycare surgery. Call 9156634201.

Just as you would not trust a general mechanic to rebuild a precision engine, you should not settle for generalised care when dealing with a condition as specific and sensitive as piles, fissures, or fistula. These are conditions that demand a specialist — someone whose entire clinical practice is built around proctology, not just passing through it.

Dr Akash N Bagade is widely regarded as the best proctologist in Mumbai for exactly that reason. With 12+ years of dedicated experience and a clinic that has been serving patients across Mumbai, Thane, and Navi Mumbai since 2014, Dr Bagade combines surgical precision with the kind of patient-first approach that keeps people coming back — and referring others.

What Does a Proctologist Treat?

A proctologist specialises in conditions affecting the anus, rectum, and colon. Common conditions that bring patients to Dr Akash N Bagade's Advanced Piles Clinic include:

- Piles (Haemorrhoids): Internal or external swelling around the anal region
- Anal Fissures: Small tears in the anal lining causing sharp pain and bleeding
- Fistula-in-Ano: An abnormal tunnel between the anal canal and outer skin
- Pilonidal Sinus: A cyst near the tailbone, often infected

Each condition has a distinct cause and treatment pathway. Grouping them under one generic "surgery" is where many patients go wrong — and why choosing the right specialist from the start saves time, money, and a great deal of discomfort.

Why Laser Treatment Is Changing Piles & Fistula Care

The older surgical methods involved large incisions, general anaesthesia, and weeks of painful recovery. Laser-based proctology has changed that significantly.

How Laser Treatment Works

At Dr Akash N Bagade's clinic, advanced laser energy is directed precisely at the affected tissue. For piles, this shrinks the haemorrhoidal mass. For fistula, it seals the tract without damaging surrounding muscles. The result is a procedure that:

- Takes under an hour in most cases
- Requires no hospital admission (daycare piles surgery)
- Causes minimal bleeding and post-operative pain
- Allows most patients to return to normal activity within 2–3 days

Patients from across Navi Mumbai and Thane regularly travel to the Andheri West clinic specifically for this laser treatment, often after being told elsewhere that open surgery was their only option.

What Makes the Best Proctologist in Mumbai Different From the Rest?

Not every specialist is equal. The best proctologist in Mumbai should offer:

- A proper clinical diagnosis before recommending surgery

- Non-surgical options where appropriate
- The ability to perform same-day procedures safely
- Transparent communication about recovery and outcomes
- A second opinion service for patients already advised surgery elsewhere

Dr Akash N Bagade provides all of the above. His clinic is part of Asia's Leading Proctology Hospital Chain — a recognition that reflects both clinical standards and patient outcomes across thousands of cases.

Why Choose Dr Akash N Bagade for Piles Treatment in Mumbai?

Here is what sets this practice apart:

- 12+ Years of Experience: Focused exclusively on proctology since 2014
- Advanced Laser Surgery: Available for piles, fistula, and fissures with minimal recovery time
- Daycare Procedures: No overnight hospital stay required for most cases
- Non-Surgical Options: For patients in early stages who are not yet candidates for surgery
- Second Opinion Service: If you have been told surgery is unavoidable, get a second evaluation before you decide
- Accessible Timings: Open Monday to Sunday, 10 AM to 7 PM
- Central Location: B-3, C-4 1st Floor, Mayfair Meridian HSG Society, Ceaser Road, Amboli, Andheri West, Mumbai – 400058

The clinic sees patients from across Mumbai's western suburbs, as well as those travelling from Thane and Navi Mumbai, who prefer a specialist clinic over a general hospital setting.

Frequently Asked Questions

Q1. How do I know if I need to see a proctologist?
If you have rectal bleeding, pain during bowel movements, itching around the anal area, or a lump near the anus, consult a proctologist. Do not self-diagnose or delay — early treatment is simpler and less invasive.

Q2. Is laser piles surgery painful?
Laser procedures at Dr Akash N Bagade's clinic are performed under local or short general anaesthesia. Most patients report significantly less post-operative pain compared to traditional surgery.

Q3. How long does daycare piles surgery take?

Most daycare piles procedures are completed within 30 to 60 minutes. Patients are typically discharged the same day and can resume light activities within 48 to 72 hours.

Q4. Can piles be treated without surgery?
Yes, in early or moderate cases. Non-surgical options such as medication, dietary changes, and minimally invasive procedures may be sufficient. Dr Bagade assesses each patient individually before recommending surgery.

Q5. Is Dr Akash N Bagade the right doctor for a second opinion on piles surgery?
Absolutely. Many patients visit the clinic specifically for a second opinion after being advised surgery at another hospital. A thorough re-evaluation often reveals alternatives that were not previously considered.

Book Your Consultation Today

A proctological condition rarely resolves on its own — and the longer it is left untreated, the more complex the treatment becomes. If you are dealing with piles, fissures, or fistula and want to consult the best proctologist in Mumbai, Dr Akash N Bagade's Advanced Piles Clinic is open seven days a week for your convenience.

Call 9156634201 or visit www.drakashnbagade.com to book your appointment. The clinic is located at Amboli, Andheri West, Mumbai — easily accessible from Thane, Navi Mumbai, and all central and western suburbs.
